File: USPT

Aug 14, 2001

DOCUMENT-IDENTIFIER: US 6275882 B1

TITLE: Method and apparatus for providing a hot docking interface for transmitting digital video data

col 4
l58
- b2 Detailed Description Text (20):

For example, in the case of the multimedia device 104 being a digital camera, the images transmitted to the computer system 100 may be displayed on a monitor, or possibly be made available on a World Wide Web (WWW) Site accessible through the Internet 118. In addition, the logic 114 of the computer system could randomly assign a Uniform Resource Locator (URL) to the images, indicating where the images can be located on the Internet. Alternatively, the logic 114 could assign a specific URL as requested by an operator of the computer system.
